

Dear all,

We are pleased to announce that the 3rd Short Term Scientific Missions (STSM) call of the COST HUPLANTcontrol CA16110 is now opened. The deadline for application is 2019 June 21st.

Please, feel free to widely diffuse this announcement.

STSM are great opportunities to strengthen existing networks, to foster collaboration between researchers and to provide new experience to young scientists (PhD, Post-docs or early Career Investigators). All the rules for applying are detailed in the COST vademecum (file attached) on pages 34-35. You will also find enclosed the Short Term Scientific Mission User Guide.

Please, remember that

- STSMs must fit within the scope of our Action, i.e. a combination of phytobiome or plant interaction and human pathogens research. Thus, the future candidates are encouraged to ensure that this is the case by visiting our website and if they have any questions or if they need any advices, they can contact the Working group leaders before applying (<https://huplantcontrol.igzev.de/work-plan/>) or any core group member.
- STSMs in the 3rd call have to be finished (including the scientific report) before the end of the 3rd year of the COST Action, i.e. March 30th 2020.

We hope that this 3rd call will generate lots of fruitful scientific discussions on Human Pathogenic Micro-organisms in Plant Production Systems and on their control that will lead to numerous STSM applications.

Kind regards

Kalliope and Isabelle
